### Summary

#### About me

Frontend Developer with hands-on experience in building responsive web applications using React and modern JavaScript.

Experienced in working with REST APIs, dynamic data, and user-focused interfaces.

Developed a full-stack image search application and multiple responsive landing pages. Familiar with basic state management and continuously improving TypeScript skills.

### Skills

- Frontend: React, JavaScript (ES6+), TypeScript (basic)
- State Management: basic understanding of Redux / Zustand
- Styling: CSS, SCSS, Tailwind CSS
- Tools: Git, GitHub, Vite, Figma
- Other: API Integration, Responsive Design, Accessibility basics

### Projects

#### Image Search App

React, Flask, MongoDB

- Built full-stack app with REST API integration
- Integrated external API (Unsplash) for real-time data fetching
- Implemented dynamic UI with real-time data
- Designed responsive interface
- Managed application state and dynamic rendering in React
- Containerized application using Docker
- GitHub: <https://github.com/Stalmax76/images-Galery>

#### Hansset - Multi-Page Website

HTML5, JavaScript(ES6+), UI/UX

- Built multi-page structure
- Implemented custom form validation
- Improved UX with dynamic states
- GitHub: <https://github.com/Stalmax76/hansset>
